3. Description of the stock acquisition right

1) Name of the right: It is called "The Seventh Stock Acquisition Right" for identification purpose.

2) The number of stocks the acquisition rights will be granted to:

The number of shares to be issued upon exercise of each stock acquisition right (i.e. "number of shares granted") shall be one thousand (1,000) shares of common stock of the Company.

In the event the Company splits its common stock (including the gratis allotment of the Company's common stock, the same being applied hereinafter) or consolidates its common stock after the allocation of stock acquisition rights is effected, the number of shares granted under stock acquisition rights which have remained unexercised at the time of the stock split or stock consolidation will be adjusted in accordance with the following formula. Any fraction of less than one (1) share resulting from the adjustment shall be disregarded;

$$\text{Adjusted number of shares granted} = \text{Number of shares granted before adjustment} \times \text{Ratio of split or consolidation}$$

In addition to the above, in the event of the Company's merger with another company, company split, capital reduction of the Company, or any other similar event in which adjustment of the number of shares granted is required after the allocation of the stock acquisition rights, the Company may suitably adjust the number of shares granted to the extent the Company considers reasonable.

If the Company splits or consolidates its common stock after the allocation date, the exercise price is adjusted by the following formula, and any fraction of less than one (1) yen resulting from such adjustment shall be rounded up.

$$\text{Exercise price after adjustment} = \text{Exercise price before adjustment} \times \frac{1}{\text{Ratio of split or consolidation}}$$

If the Company issues new shares of common stock or disposes of its treasury stocks at less than the current market price (except in the case of responding to either exercise of stock acquisition rights or request for the additional purchase of shares constituting less than one unit), then the exercise price shall be adjusted by the following formula, and any fraction of less than one (1) yen resulting from such adjustment shall be rounded up.

$$\text{Exercise price after adjustment} = \text{Exercise price before adjustment} \times \frac{\text{Number of shares already issued} + \frac{\text{Number of shares newly issued} \times \text{Amount paid per share}}{\text{Current market price per share}}}{\text{Number of shares already issued} + \text{Number of shares newly issued}}$$

Further, if the Company disposes of its treasury stocks, “Number of shares newly issued” in the formula above shall read “Number of treasury stock disposed of,” and “Amount paid-in per share” shall read “Disposal value per share” respectively.
