Details are outlined below.

1. Reasons necessitating the offer of stock acquisition rights with preferential conditions;

The issuance of stock acquisition rights to the above stated parties is aimed at improving consolidated performance by providing them with the common incentive of improving the performance of the Group as a whole, while pursuing harmonization of such parties' interests with those of shareholders.

2. Maximum number of stock acquisition rights that can be determined under the power delegation by the resolution at the shareholders' meeting;

The resolution at the shareholders' meeting provides that the maximum allocatable number of stock acquisition rights will be one thousand four hundred (1,400) stock acquisition rights. In addition, the maximum issuable number of common stocks of Tokai Tokyo Financial Holdings through the exercise of the stock acquisition rights shall be one million four hundred thousand (1,400,000) shares (approximately 0.50% of outstanding shares).

However, if adjustment is made to the maximum issuable number of shares in accordance with the paragraph 4 (1) below, such maximum issuable number of shares (hereinafter, "the number of shares granted" shall be the one we get by way of multiplying the number of shares granted after adjustment by the above specified maximum number of allocatable stock acquisition rights.

3. No payment shall be required for stock acquisition rights.

4. Details of the stock acquisition rights

(1) Number of shares to be issued upon exercise of stock acquisition rights

The number of shares to be issued upon exercise of each stock acquisition right (i.e. “number of shares granted”) shall be one thousand (1,000) shares of common stock of Tokai Tokyo Financial Holdings.

In the event the Company splits its common stock (including the gratis allotment of the Company’s common stock, the same being applied hereinafter) or consolidates its common stock after the allocation of stock acquisition rights, the number of shares granted under stock acquisition rights which have remained unexercised at the time of the stock split or stock consolidation will be adjusted in accordance with the following formula. Any fraction of less than one (1) share resulting from the adjustment shall be disregarded.

Adjusted number of shares granted = Number of shares granted before adjustment × Ratio of split or consolidation

In addition to the above, in the event of the Company’s merger with another company, company split, capital reduction of the Company, or any other similar event in which adjustment of the number of shares granted is required after the allocation of the stock acquisition rights, the Company may suitably adjust the number of shares granted to the extent the Company considers reasonable.

(2) Value of assets to be paid-in to the Company’s capital at the time of exercising stock acquisition rights, or the method of calculating such value

The value of assets to be paid-in at the time of exercising stock acquisition rights shall be the amount paid per share to be issued by the exercise of the stock acquisition rights (hereinafter “the exercise price”) multiplied by the number of shares granted. The exercise price shall be equal to the product of (*) the price determined by the following rule × (multiplied by) 1.05. Any fraction of less than one (1) yen resulting from the calculation shall be rounded up to the nearest yen.

(*) The price determination rule: The higher price of either the average of the daily closing prices of the common stock of the Company in regular transactions at the Tokyo Stock Exchange, Inc. on each of the trading days (excluding days on which no trading is made) in the calendar month immediately prior to the month when the stock acquisition rights are allocated, or the closing price of the common stock of the Company in regular transactions at the Tokyo Stock Exchange, Inc. on the allocation date (if there is no closing price on the allocation date, the most recent closing price prior to the allocation date shall apply).

If the Company splits or consolidates its common stock after the allocation date, the exercise price is adjusted by the following formula, and any fraction of less than one (1) yen resulting from such adjustment shall be rounded up.

$$\text{Exercise price after adjustment} = \text{Exercise price before adjustment} \times \frac{1}{\text{Ratio of split or consolidation}}$$

If the Company issues new shares of common stock or disposes of its treasury stocks at less than the current market price (except in the case of responding to either exercise of stock acquisition rights or request for the additional purchase of shares constituting less than one unit), then the exercise price shall be adjusted by the following formula, and any fraction of less than one (1) yen resulting from such adjustment shall be rounded up.

$$\text{Exercise price after adjustment} = \text{Exercise price before adjustment} \times \frac{\text{Number of shares already issued} + \frac{\text{Number of shares newly issued} \times \text{Amount paid per share}}{\text{Current market price per share}}}{\text{Number of shares already issued} + \text{Number of shares newly issued}}$$

Further, if the Company disposes of its treasury stocks, “Number of shares newly issued” in the formula above shall read “Number of treasury stock disposed of,” and “Amount paid-in per share” shall read “Disposal value per share” respectively.

In addition to the foregoing, in the event of merger of the Company with another Company, company split, capital reduction of the Company, or any similar case in which adjustment of the exercise price is required after the allocation of the stock acquisition rights, the Company may suitably adjust the exercise price to the extent the Company considers reasonable.
